Whole language is a discredited philosophy of the nature of reading that is based upon the premise that learning to read comes naturally to humans in the same way that learning to speak develops naturally. In assessing this claim, research psychologist Keith Stanovich asserted "The idea that learning to read is just like learning to speak is accepted by no responsible linguist, psychologist ...

The whole tone scale has no leading tone and because all tones are the same distance apart, "no single tone stands out, [and] the scale creates a blurred, indistinct effect". This effect is especially emphasised by the fact that triads built on such scale tones are all augmented triads. Indeed, all six tones of a whole tone scale can be played simply with two augmented triads whose roots are a ...
