

### **two salamanders pdf**

Salamanders are a group of amphibians typically characterized by a lizard-like appearance, with slender bodies, blunt snouts, short limbs projecting at right angles to the body, and the presence of a tail in both larvae and adults. All present-day salamander families are grouped together under the order Urodela. Salamander diversity is most abundant in the Northern Hemisphere and most species ...

### **Salamander - Wikipedia**

Specimens are up to 30 cm (12 in) long, and are found in the western United States and southwestern British Columbia. Except for their size, they are similar to the mole salamander family (Ambystomatidae), in which they were originally included. While most salamanders are silent, the Pacific giant salamander is one of several salamanders that have vocal abilities.
