training tasks that have shown some promise in training and transfer in the scientific literature. These video games are believed to be more entertaining (and motivating) than most of the cognitive tasks designed by cognitive scientists, and they can adaptively increase their difficulty level as the user's skill increases, just as "off-the-shelf" video games designed for entertainment do.

Aging is characterized by a progressive loss of skeletal muscle mass and function (sarcopenia). Obesity exacerbates age-related decline and lead to frailty.

### **Aging and Disease**

The centenarian's microbiota have shown to be less diverse than in adult persons, and have demonstrated decreased levels of Bifidobacterium, Bacteroides and Enterobacteriaceae, and increased Clostridium spp. levels compared to younger adults (Biagi et al., 2010, Drago et al., 2012). Such aging-associated differences in gut microbiota can not necessarily be caused by aging, but they might be ...

We are using molecular imaging techniques in Drosophila aiming to understand the genetic and neural basis of brain functions. Two main approaches are taken: (i) to construct a wiring diagram of the entire brain; and (ii) to understand computation in specific circuits for innate as well as learned behaviors.
