Virus. Rinderpest virus (RPV), a member of the genus Morbillivirus, is closely related to the measles and canine distemper viruses. Like other members of the Paramyxoviridae family, it produces enveloped virions, and is a negative-sense single-stranded RNA virus. The virus was particularly fragile and is quickly inactivated by heat, desiccation and sunlight.

Rinderpest - Wikipedia

The history of virology – the scientific study of viruses and the infections they cause – began in the closing years of the 19th century. Although Louis Pasteur and Edward Jenner developed the first vaccines to protect against viral infections, they did not know that viruses existed. The first evidence of the existence of viruses came from experiments with filters that had pores small ...

Thanks to the Amazon Effect, fast and free delivery is the new normal, forcing other online sellers to keep up. However, there's one area of e-commerce where online sellers can still compete logistically with Amazon and big box players: delivery of oversized, larger-than-parcel items, such as furniture, sofas, armoires, mattresses, treadmills, and more.
