TABLE OF CONTENTS - Mono County California

The Walker River is a river in west-central Nevada in the United States, approximately 62 miles (100 km) long. Fed principally by snowmelt from the Sierra Nevada mountains of California, it drains an arid portion of the Great Basin southeast of Reno and flows into the endorheic basin of Walker Lake. The river is an important source of water for irrigation in its course through Nevada; water ...

Walker River - Wikipedia

The headwaters of the West Walker River originate in the Sierra Nevada (California) at greater than 11,000 feet. Lahontan cutthroat trout and mountain whitefish were the native salmonids, but currently rainbow and brown trout and, in places, mountain whitefish are the dominant sport fishes in the Nevada portion of the river.

Walker River - West Fork - Nevada Department of Wildlife

The water is supplied principally by diversion canals from the West Walker River. The valley is enclosed by mountains except for Hoye Canyon, which transects the Pine Nut Range on the west, and Wilson Canyon, which cuts the Singatze Range on the east. The West Walker River, with headwaters in the Sierra
